

**Dr. Teresa Chung**

Hong Kong Baptist University, Hong Kong

Dr. Teresa Chung has years of research experience in molecular biology. She has been working on genetics and epidemiology in Atopic Dermatitis and Alzheimer's disease, population genomic risk, multiplexing detection using PCR technology, and is currently developing an alerting system on non-targeted detection of food adulteration using an ensemble machine-learning model.

Teresa has co-authored a number of peer-reviewed scientific articles and book chapters and is the co-inventor of patents. She obtained her B.Sc. (Hons) in Biomedical Science from the Imperial College London, M.Phil. in Translational Medicine and Therapeutics from the University of Cambridge and Ph.D. in Molecular Biology from the Hong Kong Polytechnic University.
