

Marjolein Verweij
Hendrix Genetics, The Netherlands

Working as geneticist at Hendrix Genetics, located in Boxmeer (The Netherlands). I am part of the R&D team within the business unit aquaculture. At Hendrix Genetics Aquaculture, we have breeding programmes for the species Atlantic salmon (*Salmo salar*), coho salmon (*Oncorhynchus kisutch*), rainbow trout (*Oncorhynchus mykiss*) and vannamei shrimp (*Litopenaeus vannamei*). My main focus is on our trout and shrimp breeding programmes, where I am involved in selections as well as several research project to improve our breeding programmes. Besides that I am a guest employee at the Aquaculture and Fisheries chairgroup at Wageningen University, where I focus my research on improved phenotyping of robustness traits.
