## **ABSTRACT:**

The abstract template was modified in MS Word 2021 and saved as a native format file. The file must be saved in the format of the word processor used. The text should be in a single-column format. All abstracts should be written in the English language on portrait A4 papers (210mm × 297mm) and the page must be formatted using 2.54 (1.0") margins. The abstract should briefly state the purpose of the research, the principal results, and major conclusions. An abstract is often presented separately from the article; therefore, it must be able to stand alone. Also, references and non-standard, or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. The abstract does not exceed 400 words in length. It should be in Cambria 11 pt and justify alignment. A general guideline for abstract preparation is 1. Introduction: Explain the topic's importance and the objective(s) of your work. 2. Materials and Methods: State what was done and how it was done. 3. Results: A summary of the main findings. Abstracts without any results will not be considered. 4. Conclusion: Indicate the significance and application of the research findings.

## **KEYWORDS:**

Keyword texts should be in 11 pt Cambria, not capitalized, and a maximum of 5 keywords.

Keywords should be American spelling for the English version and avoid general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible.
