

Prof. Hongbing Chen

President, Sino-German Joint Research Institute, Nanchang University, PR. China

- Ph.D. A member of National special support program for high-level personnel recruitment, and a member of the “National Hundred, Thousand, and Ten-Thousand Talents Project”
- Group leader of Innovation team on food allergy in key areas of Ministry of Science and Technology of the People’s Republic of China
- State-Council Allowance Special Expert
- Visiting scientist in Okayama University, Japan, Wageningen University, the Netherlands and the University of Georgia, USA
- Member of FAO/WHO Expert Consultation on Risk Assessment of Food Allergen
- Member of the Expert Advisory Committee of China National Codex Committee
- Executive Director of China Animal Products Processing Research Association
- Vice chairman of the Allergy and Clinical Immunology Committee of the Chinese Research Hospital Association
- General secretary of Jiangxi Food Society

Research Focus:

food allergen including 1) structure and function of food allergens; 2) Risk assessment of food allergens; 3) gluten-free functional food for celiac disease. We have identified the precise structures in food allergens for desensitization and detection.

Our work filled the gaps in epidemiological data of celiac disease in China. Moreover, our works have directly promoted the establishment of Jiangxi Province Key Laboratory of Food Allergy and Research Center for Diagnosis and Treatment of Celiac Disease in Xinjiang Uygur Autonomous. Moreover, He is (co)author of about 200 peer-reviewed research papers on food allergy, where more than 100 papers were cited by SCI.
